

WA Community Recovery Bushfire Grants Program - Information Pack

Introduction

The Community Enterprise Foundation™, on behalf of Sandhurst Trustees Limited, established the National Bushfire Disaster Appeal and individual state appeals in response to the devastating bushfires which impacted communities across Australia in 2019/2020.

As we approach the anniversary of these bushfires and with communities still reeling from the additional impact of COVID-19, it's critical that we continue to support impacted communities while recognising that recovery is a marathon rather than a sprint. To aid this recovery process, the Foundation has established the Community Recovery Bushfire Grants Program.

The Foundation's focus is to assist in the continued relief, recovery and reconstruction of communities and people impacted by the Black Summer Bushfires over three key stages: short, medium, and long-term.

Grants Program

The WA Community Recovery Bushfire Grants Program will seek applications from eligible charitable organisations for funding of projects and programs from bushfire affected communities in Western Australia.

This program will focus on the short term, community led recovery of communities that were impacted by the Black Summer Bushfires in 2019/2020. The program will also support communities with their bushfire preparedness initiatives.

Funding will support the resilience, rebuilding and strengthening of the social fabric within communities, with priority given to community-led activities that promote: -

People

Supporting individual recovery and resilience building

Social

Supporting community connectedness and recovery of organisations

Economic

Supporting community initiatives that assist in the economic restoration of communities

Environmental

Supporting the conservation and re-establishment of the natural environment
