Date from which this target market determination is effective

5 October 2021.

1. Target market for this product

Target Market

This TMD only concerns one type of borrower who might require this product, i.e. borrowers who are 'retail clients' within the meaning of the Design and Distribution Obligations (DDO) legislation. For the avoidance of doubt, this document does not apply to and may be ignored in respect of other types of borrowers who are not 'retail clients' for the purpose of the DDO legislation, such as borrowers who require credit for business purposes.

The retail clients for whom this product has been designed include small businesses (specifically, companies, partnerships and trusts) who:

- do not propose to use the loan wholly or predominantly for business purposes;
- are able to grant a first-ranking registered real property mortgage in respect of one or more residential or commercial real properties to Bendigo Bank to secure the loan;
- want a term loan to finance or refinance the acquisition, renovation and/or improvement of residential or commercial property for the purpose of it being used as an investment;
- want to make principal and interest payments over the term of the loan;
- want flexibility to make additional repayments and have access those early repayments;
- can afford the loan;

The retail clients for whom this product has not been designed are individuals or strata corporations who:

- require credit wholly or predominantly for personal, domestic or household purposes; or
- require credit to finance or refinance the purchase, renovation or improvement of a residential property for investment purposes.

Product Description

Bendigo Bank's Business Flexi Principal & Interest Loan (Variable Rate) is a variable interest rate term loan (up to a term of generally 5 years) which is used to finance or refinance the acquisition, renovation and/or improvement of a residential or commercial investment property. This loan allows retail clients to make additional repayments without incurring early repayment costs and have access to them. Regular principal and interest repayments are required over the term of the loan.

Product key attributes

The key attributes of this product that make it likely to be consistent with the target market described above, include:

Attribute	Appropriate for
Term loan	Retail clients that want to repay their loan over medium to long term period (up to a term of generally 5 years).
Minimum loan amount	Retail clients who want to borrow at least \$20,000 generally.
Property Investment	Retail clients who will use the financing for the purpose of acquiring a residential or commercial property investment. This product may not be suitable for retail clients who will use the residential property to live in as a principal place of residence.
Suitable Entity Type	This product may not be suitable for individuals.
Regular repayments of principal and interest	Retail clients make regular scheduled principal and interest repayments over the term of the loan. Retail clients can choose from monthly, quarterly or half-yearly repayment frequencies. Being a variable interest rate loan, the scheduled repayment amounts may be affected by a differing applicable interest rate over the term of the loan.
Variable interest rate	A variable interest rate means the interest rate may increase or decrease over the term of the loan. Variable interest rates may be more appropriate for retail clients who are able to sustain repayments where the interest rate rises while benefiting where the interest rate drops. This product may not be suitable for retail clients who require certainty around repayments by having a fixed interest rate.
Early repayments and redraw	Retail clients who want the flexibility to make additional repayments without incurring early repayment fees, and the ability to access those repayments (1 repayment amount is preserved and not accessible).
Notional Terms and Residual Balance	Retail clients who want their principal and interest repayments calculated on a term that's longer than their contracted loan term have the option of their repayments being calculated based on a Notional Term. Because their repayments will be calculated on a Notional Term which is longer than their contracted loan term, their repayments will be lower throughout their loan term but they will be required to repay or refinance a Residual Balance at the end of their loan term. This option may be suitable for retail clients who wish to have lower repayments over their loan term, provided they are able to repay or refinance the Residual Balance at the end of the loan term.
Interest Rate Risk Management	Retail clients may wish to manage certain risks pertaining to interest rate movements by utilising an Interest Rate Risk Management solution. This may include: <ul style="list-style-type: none"> • Interest Rate Cap: Allows the client to set a known maximum variable rate • Interest Rate Collar: Allows the client to set a known range of variable rates to guarantee a maximum and minimum rate • Interest Rate Swap: Allows the client to receive certainty by locking in a known fixed rate for the contracted term of their loan
