

Sandhurst Industrial Share Fund

Monthly fund update - November 2020

Investment approach

The Fund aims to deliver income and capital growth over the long term by investing in a diversified portfolio of quality ASX listed industrial shares (excluding resource shares) where these assets are identified by Investors Mutual Limited (IML) as being undervalued.

31 December 2019	\$0.03000
30 June 2020	\$0.05754

Make the most of your investment

► The power of compounding

Compounding can be a powerful tool in wealth creation. Reinvesting distributions can be one of the easiest and cheapest ways to increase your holdings over time. You're compounding your investment's growth by continually adding more units which, in turn, will generate distributions of their own.

Why not reinvest your half yearly distributions?

► The benefits of making it regular

Making regular contributions to your investment can both grow your investment and smooth the effects of market highs and lows.

Why not add a Regular Savings Plan to your investment? Establish one from as little as \$50 per month.

You can also use BPAY® to add to your investment at any time with as little as \$100. See your statement for your BPAY reference number.

Sharemarket commentary⁵

- ▶ Global sharemarkets surged over the month thanks to positive vaccine news and US election clarity
- ▶ The Australian sharemarket enjoyed one of its best months on record, gaining +10.2% for the month

Global equity markets enjoyed one of their strongest months on record, surging on optimism about Joe Biden's US Presidential Election victory and a series of breakthroughs in the development of a COVID-19 vaccine.

Domestically, the Reserve Bank of Australia cut the cash rate by a further 0.15% in early November, taking the cash rate down to a new record low of 0.10%, while also announcing a further \$100 billion in bond purchases as part of its quantitative easing programme.

The strong rally in global equities saw the Australian sharemarket, as measured by the ASX300, produce its best month on record, returning +10.2% in November.

Portfolio performance & summary⁵

- ▶ IML continue to be selective in their approach looking to buy companies that are well positioned for the next 3 to 5 years

The portfolio enjoyed a strong month, returning +11.2%, which was better than the benchmark's return of +10.1%. Encouragingly, many of the holdings benefited from the rotation back into quality companies trading on attractive valuations, such as Telstra, Tabcorp, Event Hospitality & Entertainment and Aurizon. Importantly, IML's caution toward many of the concept and fad companies that previously benefited as a result of the pandemic held the Fund in good stead.

Outlook⁵

Continued record low interest rates, government stimulus and the recovery in many parts of the Australian economy, has led to a sweet spot for the Australian equity market, with many companies' share prices rallying strongly over the past month. Having said this, the outlook for 2021 remains relatively uncertain given the many imbalances in the economy as things normalise. IML continue to focus on companies that, in their view, have a strong franchise, experienced and capable management, and a resilient business that can continue to generate healthy cashflows over the next few years.

Our publications, ratings and products should be viewed as an additional investment resource, not as your sole source of information. Past performance does not necessarily indicate a financial product's future performance. To obtain advice tailored to your situation, contact a professional financial adviser.
The 'Morningstar Rating' is an assessment of a fund's past performance - based on both return and risk - which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. 'Morningstar Category Rank' is the Fund's performance rank relative to all funds in the same Morningstar Category. Investments are placed into Morningstar Categories based on their compositions and portfolio statistics so that investors can make meaningful comparisons.
