

## Monthly fund update - October 2021

### Investment objective and return

The Fund invests via a selection of expert asset managers that specialise in managing specific asset classes and which take into account environmental, social, ethical and governance (ESG) considerations in their asset selection. The Fund targets a minimum level of 75% of the total assets of the Fund being managed by asset managers that take into account ESG considerations in their investment decisions. The Fund has an objective of entirely excluding investments in companies that manufacture tobacco or tobacco-related products and controversial weapons. Controversial weapons include anti-personnel landmines, cluster munitions, chemical, biological and nuclear weapons. Other activities Sandhurst monitors and aims to reduce are adult entertainment, alcohol, gambling, animal testing and companies with high event controversy.

ESG considerations are primarily applied to listed shares (both Australian and International) and fixed interest. The investment portfolio is constructed in a manner that Sandhurst believes will meet the investment return objective of a return after fees in excess of 4% above inflation over a full market cycle (typically 7 to 10 years).

### RIAA Certification

The Fund has been certified by the Responsible Investment Association of Australasia (RIAA) according to the strict disclosure practices required under the Responsible Investment Certification Program<sup>2</sup>

## Make the most of your investment

### ► The power of compounding

Compounding can be a powerful tool in wealth creation. Reinvesting distributions can be one of the easiest and cheapest ways to increase your holdings over time. You're compounding your investment's growth by continually adding more units which, in turn, will generate distributions of their own.

### Why not reinvest your half yearly distributions?

### ► The benefits of making it regular

Making regular contributions to your investment can both grow your investment and smooth the effects of market highs and lows.

### Why not add a Regular Savings Plan to your investment? Establish one from as little as \$50 per month.

You can also use BPAY<sup>®</sup> to add to your investment at any time with as little as \$100. See your statement for your BPAY reference number.

## Portfolio Performance

The Bendigo Socially Responsible Growth Fund returned approximately 0.9% in the month of October, this was relatively strong compared to the average peer fund return of approximately 0.2%. The fund achieved top quartile returns thanks to outperformance of the VanEck MSCI Australian Sustainable Equity ETF that was recently introduced. The change in Australian equity managers has provided more benefit than just financial, the introduction of VanEck has materially reduced overall exposure to companies that have experienced highly controversial business events. The VanEck ETF holds no exposure to all the negative screens that Sandhurst monitor. There will be another manager change to come that will further enhance not only the investment outcomes of the Fund but also the social impact of its underlying investments.

## Economic commentary

October was a mixed month for asset returns. On the growth side of the ledger, developed world equities (measured by the MSCI World Ex Australia index) returned 1.7%, as corporate earnings were stronger than expected. As of writing, US corporates have reported double digit earnings growth despite fears of rising inflation and pressure on profit margins. Conversely, fixed interest investments came under pressure due to rising bond yields.

Central banks' stance that higher inflation is largely transitional was challenged by the bond market in October as selling resulted in yields moving higher. Annual CPI prints have risen to levels that are now within or above target bands of many central banks (2-3%). Higher energy prices, housing costs and supply chain constraints have played a role in driving expectations for further tapering of bond purchases and cash rate movements earlier than previously thought. Australian bonds, as measured by the Bloomberg Ausbond Govt 0+ Year Index, returned -3.6% in October.

China's engineered economic slowdown continues to concern investors. This coupled with fears of a potential Evergrande (property developer) collapse saw the China dominated MSCI Emerging Market index fall 2.9% in October. Performance outcomes have diverged between developed and emerging market equities over the last 12 months. Global developed world equities have returned 31.4% while emerging market equities have returned 9.4%, opening a 22% performance gap.

Developed world equity valuations appear expensive in an absolute sense but relative to bonds are attractive. Economic growth is slowing from peak levels recorded earlier in the year while inflation prints remain elevated. Company earnings continue to surprise to the upside, while rising vaccination rates should lead to continued opening of economies, with Australia to be a notable beneficiary in the final quarter of the year. The Diversified funds are well placed to navigate through the complexities facing markets with diverse fund exposures set to benefit from a range of outcomes.

### Footnotes

1. Fund Performance figures are calculated before tax and after fees and costs; using withdrawal prices and assumes distributions are reinvested. Past performance is not an indication of future performance.
2. The Responsible Investment Certification Program does not constitute financial product advice. Neither the Certification Symbol nor RIAA recommends to any person that any financial product is a suitable investment or that returns are guaranteed. Appropriate professional advice should be sought prior to making an investment decision. RIAA does not hold an Australian Financial Services Licence.
3. Morningstar rates managed funds from one to five stars based on how well they've performed (after adjusting for risk) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods - three, five, and 10 years - and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations.  
Bendigo Socially Responsible Growth Fund received a 4-Star Overall Morningstar Rating™ out of 180 Multisector Growth funds as of 31 October 2021. In the Morningstar Multisector Growth Category, the Bendigo Socially Responsible Growth Fund 3 year return was ranked 37 out of 180 funds as of 31 October 2021. 'Morningstar Category Rank' is the Fund's performance rank relative to all funds in the same Morningstar Category. Investments are placed into Morningstar Categories based on their compositions and portfolio statistics so that investors can make meaningful comparisons.
