Market Commentary

The disruption caused by the outbreak of COVID-19 continues to impact economies around the world. The Reserve Bank of Australia (RBA) lowered rates in November, reducing the official cash rate to 0.10%, the lowest in Australian history. The RBA continues to provide liquidity to the financial system through policy measures intended to keep interest rates low across the yield curve which is expected to assist Australia's economic recovery. The Fund deposit rate increased late in December to 0.06% p.a. reflecting the impact of a small reduction in management fee rather than a genuine increase in income generated by the Fund assets.
