Quarterly commentary

The Fund increased fixed investment rates in April and June during the quarter, and again on 1 July 2022 reflecting the increase in returns from assets. The Reserve Bank of Australia (RBA) increased official cash rates in May and June, moving from the historically low rate of 0.10% to 1.35%. Whilst income generated from the assets of the Fund continues to be impacted by the current portfolio mix being weighted toward diversified, high quality mortgage backed securities, the movement in cash rates supported the portfolio yields across all assets held.
