

Monthly fund update - February 2021

Investment approach

Each Fund invests via a selection of expert asset managers that specialise in managing specific asset classes. Sandhurst will invest the Fund's assets across a variety of asset classes. Together through the selection of expert asset managers and the asset allocation, Sandhurst will seek to meet or exceed the investment return objective of each Fund. Each Fund aims to provide a total return after fees in excess of a stated percentage above inflation over a full market cycle (typically 7 to 10 years).

Fund performance¹

Make the most of your investment

You need \$50,000 to start an investment in one of our Bendigo Managed Wholesale Funds

► The power of compounding

Compounding can be a powerful tool in wealth creation. Reinvesting distributions can be one of the easiest and cheapest ways to increase your holdings over time. You're compounding your investment's growth by continually adding more units which, in turn, will generate distributions of their own.

Why not reinvest your half yearly distributions?

► The benefits of making it regular

Making regular contributions to your investment can both grow your investment and smooth the effects of market highs and lows.

Why not add a Regular Savings Plan to your investment? You can establish one from as little as \$50 per month.

You can also use BPAY® to add to your investment at any time with as little as \$100. See your statement for your BPAY reference number.

® Registered to BPAY Pty Ltd ABN 69 079 137 518

Performance commentary

Returns for the month of February were mixed across the risk profiles as bond yields started to rise following the roll out of vaccines and proposed additional fiscal stimulus. The rise of bond yields affected most major asset classes negatively, but the degree of underperformance was exacerbated in assets such as bonds and pockets of overvalued growth equities. Active management contribution was mixed, Bennelong posted another strong quarter, but other Australian equity managers lagged the benchmark due to lower exposures to commodity stocks which have been beneficiaries of fiscal spending around the globe in response to the pandemic. Global equity managers fared better than the benchmark adding value to the funds. The team have the funds well placed to defend against rising inflation expectations with a recently introduced exposure to commodity stocks coupled with existing exposures to gold and value stocks. However, diversification is key given the recovery will likely be bumpy and as a result the funds also have exposures that will benefit from inflation failing to rise such as technology stocks and fixed nominal bonds.

Economic commentary

Risk assets ended the period in positive territory but softened as bond yields rose in response to higher inflation expectations and an improved economic growth outlook. Additional large fiscal stimulus from the US coupled with the mass roll out of vaccinations across the globe underpin the rise in expectations. The Nasdaq, dominated by growth technology stocks, suffered the worst response to the rise in inflation expectations and increased optimism around the outlook for economies reopening. Technology stocks benefitted most from shutdowns, so this tailwind normalising has some investors questioning the valuation gap between growth and value orientated sectors which would benefit greatly from reopening and a reduction in the output gap.

Evidence of a large fiscal stimulus program improving economic growth came in the Australian December quarter GDP print. Following the first recession recorded in over 30 years, economic growth expanded 3.1% following a 3.4% rise in the September quarter. It represents the first time in 60 years that Australia has recorded more than 3% growth in 2 consecutive quarters. A V-shape recovery appears to be taking place in Australia with year-on-year GDP only 1.1% below December 2019 figures. An outstanding outcome when one reflects on the measures taken during 2020 to curb the spread of infections.

Looking forward, fiscal and monetary policy must remain loose to support economies. Also, it will be important for the distribution of vaccines to continue smoothly to ensure the world returns to economic growth. Australia still requires gains in employment to return to full employment and maintain inflation within the RBA's target range, however, progress has been made towards this goal since the height of the lockdowns.

Footnotes

1. Fund performance figures are calculated before tax and after fees and costs; using withdrawal prices and assumes distributions are reinvested. Past performance is not an indication of future performance.
2. Morningstar rates managed funds from one to five stars based on how well they've performed (after adjusting for risk) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods - three, five, and 10 years - and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations.

Bendigo Defensive Wholesale Fund received a 4-Star Overall Morningstar Rating™ out of 24 Multisector Conservative funds as of 28 February 2021. In the Morningstar Multisector Conservative Category, the Bendigo Defensive Wholesale Fund 5 year return was ranked 4 out of 24 funds as of 28 February 2021. 'Peer Comparison' performance refers to the performance of the relevant 'Morningstar Category' for the stated period. Investments are placed into Morningstar Categories based on their compositions and portfolio statistics so that investors can make meaningful comparisons. 'Morningstar Category Rank' is the Fund's performance rank relative to all funds in the same Morningstar Category.
