

Monthly fund update - February 2022

Investment approach

Each Fund invests via expert asset managers that specialise in index strategies that seek to track the performance of selected benchmarks as well as alternative assets and cash. Alternative assets and cash may or may not invest in index strategies. Sandhurst will invest each Fund's assets across a variety of asset classes in a manner that we believe will meet the investment return objective of each Fund. Each Fund aims to provide a total return after fees in excess of a stated percentage above inflation over a full market cycle (typically 7 to 10 years), where inflation is measured by the Australian Consumer Price Index (CPI).

Make the most of your investment

You need \$50,000 to start an investment in one of our Bendigo Managed Wholesale Funds

► The power of compounding

Compounding can be a powerful tool in wealth creation. Reinvesting distributions can be one of the easiest and cheapest ways to increase your holdings over time. You're compounding your investment's growth by continually adding more units which, in turn, will generate distributions of their own.

Why not reinvest your half yearly distributions?

► The benefits of making it regular

Making regular contributions to your investment can both grow your investment and smooth the effects of market highs and lows.

Why not add a Regular Savings Plan to your investment? You can establish one from as little as \$50 per month.

You can also use BPAY® to add to your investment at any time with as little as \$100. See your statement for your BPAY reference number.

® Registered to BPAY Pty Ltd ABN 69 079 137 518

Performance commentary

Returns for the period fell short of the Morningstar peer group. Driving the relative return was the lack of exposure to unlisted investments such as private equity, unlisted property, infrastructure and private credit. Given the index, low cost nature of the Funds, unlisted investments are not currently invested in. Unlisted investments adopt less frequent valuations and hence they are not subject to short term market volatility such as the events of January.

Over the month active tilts away from interest rate sensitive investments such as fixed government bonds and exposures to gold both benefited the Funds.

Economic commentary

The major focus over the month was the invasion of Russia into Ukraine. Whilst this is a terrible humanitarian event, for markets the ramifications centres around the disruption of global trade, in which outcomes align to a slowing of global growth with inflationary pressures. Russia and Ukraine are major contributors to the world's commodities market, in particular oil and gas, agriculture, fertilizers and steel. Disruptions due to the invasion are likely to result in the increase price of many consumables across the world, throwing further chaos into already fractured supply chains, which have been impacted by Covid lockdowns.

The month of February was a negative month for the majority of risk assets, as concern over Russia escalated. Gold rose, in which this asset class is favourable due to its safe haven status in geopolitical events such as war. Bond yields over the period lifted, due to the concern over supply disruptions pushing inflation higher. Whilst the majority of asset classes returned negative, the outlier was Australian equities, in which a strong reporting period by Australian banks, coupled with buoyed commodity prices which positively impacted our miners, aided the returns in this asset class. Australian equities have held up better than the majority of global indices, in which resource companies aside, the index possesses a large proportion of companies that are less reliant on sales outside of Australia, in particular Europe.

Looking forward global equities face multiple headwinds. Recession is now looming over Europe, and increased costs on everyday goods is sure to weigh on consumer demand, resulting in potential lower earnings for corporates. Equity markets relative to historical are expensive and the US Federal Reserve is set to raise interest rates, withdrawing liquidity from the market, in a period where share prices are looking vulnerable.

Footnotes

1. Fund performance figures are calculated before tax and after fees and costs; using withdrawal prices and assumes distributions are reinvested. Past performance is not an indication of future performance.

2. Morningstar rates managed funds from one to five stars based on how well they've performed (after adjusting for risk) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods - three, five, and 10 years - and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations.

Bendigo Defensive Index Fund received a 5-Star Overall Morningstar Rating™ out of 24 Multisector Conservative funds as of 28 February 2022. In the Morningstar Multisector Conservative Category, the Bendigo Defensive Index Fund 5 year return was ranked 1 out of 24 funds as of 28 February 2022. 'Peer Comparison' performance refers to the performance of the relevant 'Morningstar Category' for the stated period. Investments are placed into Morningstar Categories based on their compositions and portfolio statistics so that investors can make meaningful comparisons. 'Morningstar Category Rank' is the Fund's performance rank relative to all funds in the same Morningstar Category.

For more information refer to our Financial Services Guide (AU) or Financial Advice Provider Disclosure Statement (NZ) at www.morningstar.com.au/s/fsg.pdf and www.morningstar.com.au/s/fapds.pdf. You should consider the advice in light of these matters and if applicable, the relevant Product Disclosure Statement before making any decision to invest. Our publications, ratings and products should be viewed as an additional investment resource, not as your sole source of information. Past performance does not necessarily indicate a financial product's future performance. To obtain advice tailored to your situation, contact a professional financial adviser. The Morningstar Rating is an assessment of a fund's past performance – based on both return and risk – which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision.

3. Management costs are based on costs incurred by the Fund in the past financial year and may be different in the current and future financial years. Other fees and costs may apply. See the Product Disclosure Statement for full details.

The managed funds detailed in this update (individually referred to as 'Fund' or collectively as 'Funds') are issued by Sandhurst Trustees Limited (Sandhurst) ABN 16 004 030 737 AFSL 237906 a subsidiary of Bendigo and Adelaide Bank Limited (the Bank) ABN 11 068 049 178 AFSL 237879. Sandhurst and the Bank receive remuneration on the issue of the Funds or the service they provide, full details of which are contained in the relevant Product Disclosure Statement (PDS).
